11 ADA/BATC ` Battle Captain Saturday, Mc 22, 2003 7:20 PM

Col 11th ADA BDE; 11 ADA/XO Deputy Command Officer

FW: Launch Info رject:

.---Original Message-----From: 11 ADA/FCO

Sent: Sunday, March 23, 2003 2:13 AM

ro: 11 ADA/BATCAP Battle Captain;

Maj 11th Brigade

Cc: 11 ADA/CDR Commander

Subject: Launch Info

Sir here is all the info i have received to this point:

F: No response

rack # 28

)TG 222347zMAR03

flissile Shot: 1 ATM / LS7 / Upper Left Can

Io Mode 1 Codes Loaded

ab 78 ASM Engagement setting: Manual

rack had ARM Symbology

k never had TBEQ Symbology

w did not check TBEQ Page

lo GIP

TC9

OMMS CONFIG: PADIL voice and data from USICC to B/2-1. FMs from B/2-1 to C/5-52 (No Data)

D never ordered engagement C did not see on scope D never ordered LS to OPER RC did not order engagemnet RC did not have track on scope

RC never ordered LS to OPER

CS Crew: TCO 1LT

TCA SPC

C CREW: TD 1LT DA SPC

RC: TD CPT

2-1 ECS: TCO 1LT

/ TDA SSG

nis is what I have. I believe this info to be the most reliable in the AO. Flow of info to me was C/5-52 to B/2-1 to USICC CRC.

- Purpose. This annex provides a description of the duties and responsibilities of the Air Defense Cell for the Lucky Main command post, which manages/monitors information, conducts coordination assists in planning, and provides recommendations to the CFLCC commander and staff on matters pertaining to active air defense.
- 2. Description. The JFC normally assigns overall responsibility for air defense to the Area Air Defense Commander (AADC) and overall missile defense to the Missile Defense Coordinator (MDC). These two positions along with the Airspace Control Authority (ACA) and Coalition Force Air Component Commander (CFACC) is normally assigned to the same individual. The CFLCC provides broad guidance to the components concerning their responsibilities and relationships in these areas. The extent of CFLCC staff involvement will be dependent on the guidance and responsibilities issued by the JFC. At a minimum, the CFLCC must monitor the conduct of air defense operations, focusing on the EAC units. The Air Defense Cell, in coordination with the AAMDC, will be the focal point for monitoring, and coordination of Theater Air and Missile Defense (TAMD) issues. The Air Defense Cell will advise and make recommendations to the CFLCC Commander and staff on all issues pertaining to their areas of responsibility.

- 3. **Organization**. The Air Derense Cell will be composed of staff officers working for the C3 and liaison personnel from the Army Air Missile Defense Command (AAMDC). The senior Air Defense Cell officer will be designated as the Air Defense Watch Officer and report directly to the C3 Current Operations Chief.
- 4. Responsibilities of the Air Defense Cell.
  - a. Have copies and /or be familiar with the following areas; a continuity book should contain many of these items:
    - 1) Enemy Air Order of Battle.
    - 2) Air and TMD Rules of Engagement (ROE).
    - 3) Air Defense Plan and/or Joint Air Operations Plan.
    - 4) Air Tasking Order (ATO) and/or Airspace Control Order (ACO).
    - 5) Air Defense Annexes of component OPORDs.
    - 6) Current location, engagement, and status reports of TMD assets.
    - 7) Current TMD early warning procedures.
    - 8) Current Air Defense Warning and Weapons Control Status.
    - 9) Current list of critical TMD priorities.
  - b. Maintain coordination with:
    - 1) AADC.
    - 2) EAC AD Brigade.
    - 3) AAMDC.
    - 4) Missile Defense Coordinator (MDC) element.
    - 5) Air Operation Center (AOC).
    - 6) ARCENT/MARCENT Staff Sections.
    - 7) Theater Army Air and Missile Defense Coordinator (TAAMDCOORD).
    - 8) Other component Air Defense staff elements.
  - c. Provide input/recommendations on:
    - Active TMD tasking, guidance, planning, and recommendations to higher echelons from the CFLCC Commander.
    - 2) CFLCC actions, planning, and operations concerning Air Defense issues.
    - 3) Mission analysis.
  - d. Other duties and responsibilities include:
    - Coordinate, assemble, and provide daily update briefings to the Commander CFLCC as required.
    - 2) Coordinate with other component staffs to ensure compliance with CFLCC guidance and objectives for active defense operations.
    - 3) Collect and provide daily Situation Reports (SITREPs) from the active defense elements to the CFLCC Operations section as required.

- 4) Assist the C2 and AMDC in development of the intellige requirements as required.
- 5) Assist AAMDC in the integration of active air defense assets into Joint and Combined OPLANs.
- 6) Provide 24-hour interface, tactical advice, and operational status of active air defense assets.
- 7) Provide 24-hour interface, coordination, and data exchange between the CFLCC and components on active air defense issues.
- 8) Ensure the TAAMDCOORD and EAC ADA Brigade Commander are informed of any developing changes that may affect their operations or require action on their part.

SUBJ: FRIENDLY FIRE INCIDENT

REF/DOC/DODI 6055.7//
AMPN//ACCIDENT INVESTIGATION, REPORTING, AND RECORD KEEPING//
1. IN I IAW THE REFERENCE, CDRUSCENTCOM DIRECTS CFACC TO CONDUCT A
COMBINED INVESTIGATION INTO A SUSPECTED FRIENDLY FIRE INCIDENT THAT
OCCURRED O/A 22 MARCH 2003 IN NORTHERN KUWAIT, IN WHICH A PATRIOT
MISSILE BATTERY FIRED UPON A GU-4 TORNADO AIRCRAFT OF HER MAJESTY'S
ROYAL AIR FORCE, RESULTING IN THE DEATHS OF TWO ROYAL AIR FORCE
PERSONNEL.

2. ( THE INVESTIGATION WILL, IAW PARAGRAPH E4.6. OF THE REFERENCE, INQUIRE INTO ALL FACTS AND CIRCUMSTANCES SURROUNDING THE SUSPECTED FRIENDLY FIRE INCIDENT AND WILL OBTAIN AND PRESERVE ALL AVAILABLE EVIDENCE FOR USE IN LITIGATION, CLAIMS, DISCIPLINARY ACTION, AND ADVERSE ADMINISTRATIVE ACTIONS. THE INVESTIGATION WILL INCLUDE FINDINGS OF FACT, OPINIONS AND RECOMMENDATIONS TO INCLUDE THE CAUSE OF THE INCIDENT AND RESULTING DEATHS, INJURY AND DAMAGE. FURTHER, THE INVESTIGATION WILL MAKE AN ASSESSMENT AS TO ANY FAULT OR NEGLECT AND MAKE RECOMMENDATIONS CONCERNING CORRECTIVE MEASURES AND DISCIPLINARY ACTIONS, AS APPROPRIATE. ALL PHYSICAL EVIDENCE (E.G., AIRCRAFT VIDEO AND AUDIO RECORDINGS) WILL BE IMMEDIATELY SECURED, PRESERVED, AND PROVIDED TO THE INVESTIGATING BOARD UPON REQUEST. 3. THE INVESTIGATION WILL BE CONDUCTED BY A BOARD OF OFFICERS, WITH A GENERAL OFFICER NAMED AS ITS PRESIDENT, AND COMPOSED OF ADDITONAL OFFICERS OF APPROPRIATE TRAINING AND EXPERTISE. THE BOARD WILL BE SUPPORTED BY SPECIAL ASSISTANTS SUCH AS LEGAL ADVISERS, PUBLIC AFFAIRS OFFICERS, AND MEDICAL, SAFETY AND TECHNICAL EXPERTS. FINALLY, THE BOARD WILL HAVE ASSIGNED ADMINISTRATIVE SUPPORT PERSONNEL QUALIFIED TO CATALOG, MAINTAIN AND PRESERVE ALL EVIDENCE, DOCUMENT CHAIN OF CUSTODY, AND TAKE AND TRANSCRIBE TESTIMONY OR STATEMENTS, IN ORDER TO ENSURE AVAILABLITY AND ADMISSABILITY FOR ANY POSSIBLE FUTURE LEGAL ACTIONS. THE MANNER OF CONDUCT OF THE BOARD WILL BE AS DIRECTED BY THE BOARD CHAIR. WHILE SERVICE REGULATIONS MAY BE USED AS A GUIDE, THE REPORT OF INVESTIGATION WILL MEET THE REQUIREMENTS SET FORTH IN THIS MESSAGE.

4. UK AUTHORITIES MAY APPOINT AN OFFICER TO PARTICIPATE IN THIS INVESTIGATION BOARD. THE PRESIDENT OF THE BOARD OF INVESTIGATION WILL COLLABORATE WITH HIM ON OPINIONS AS TO THE CAUSE OF THE INCIDENT AND SEEK HIS RECOMMENDATIONS AS TO CORRECTIVE MEASURES TO THE EXTENT THEY ADDRESS COMBINED OR COALITION MILITARY ACTIVITIES. IN ADDITION AND AS APPROPRIATE, THE US PRESIDENT AND THE UK PARTICIPANT MAY EACH MAKE INDIVIDUAL FINDINGS OF FACT, OPINIONS OR RECOMMENDATIONS, OR RESERVE CONCURRENCE ON SPECIFIC MATTERS AS EACH OF THEM MAY DEEM

tornado APPROPRIATE. ASSESSMENTS AS 'N FAULT OR NEGLECT AND RECOMMEN' TONS CONCERNING ADMINISTRATIVE AN ISCIPLINARY ACTIONS INVOLVING PERSONNEL SHALL ONLY BE MADE THROUGH US BOARD MEMBERS. THE UK PARTICIPANT WILL CONDUCT LIAISON WITH HIS NAITONAL REPRESENTATIVES IN THE CONDUCT OF THEIR INTERNAL BOARD OF INVESTIGATION INTO THIS INCIDENT. HOWEVER, INFORMATION, DATA EVIDENCE, WITNESS STATEMENTS OR ANY OTHER MATERIAL PROVIDED TO, OBTAINED OR DEVELOPED BY THE INVESTIGATING BOARD WILL ONLY BE PROVIDED TO UK AUTHORITIES SUBJECT TO SAFEGUARDS AND USE RESTRICTIONS SET FORTH IN APPLICABLE US AND BRITISH NATIONAL LAWS AND REGULATIONS. INFORMATION CONCERNING THE BOARD PROCEEDINGS, TESTIMONY, FINDINGS CONCLUSIONS AND/OR RECOMMENDATIONS SHALL BE RELEASED AS AGREED UPON BY THE RESPECTIVE GOVERNMENTS. ALL PUBLIC AFFAIRS ACTIVITY SHALL BE COORDINATED IN ADVANCE WITH USCENTCOM PAO, COL , USCENTCOM FWD, (ALL SMALL CASE).

6. (ALL SMALL CASE).

6. (ALL SMALL CASE). 30 APRIL 2003, ANY REQUESTS FOR EXTENSION SHOULD BE SUBMITTED TO USCENTCOM FWD, ATTN: CCJA, IN WRITING PRIOR TO THIS DATE.// 7. FUNDING. USCENTCOM WILL NOT PROVIDE FUNDING FOR THIS EFFORT. FOR THE US: USCENTCOM SJA, CAPT POCS. USCENTCOM FWD, DSN (ALL SMALL CASE).

SMDC-AR-FS-C

25 March 2003

#### MEMORANDUM THRU US ARMY SPACE COMMAND

MEMORANDUM FOR USSTRAT, SPOC

SUBJECT: Request for DELOG, 222345Z MAR 03

- 1. Following event was capture by CENTCOM on possible PATRIOT Intercept over Kuwait on 22 March, 23:48:04Z.
- a. Crew observed an event over Kuwait at 23:48:03Z, with a LAT/LON of 29:43:01N/47:21:59E.
  - b. Observed 3 Scans of data off Flight 21 and 2 scans of data off Flight 20.
  - c.
  - d. Maximum Intensity registered at 11,485 Kilowatts.
- 2. JTAGS Operators attempted to process event as possible Tactical Ballistic Missile (TBM), but event did not match current data base information or criteria. Because event was determined not to be a valid TBM, operators then acknowledge an event was in progress but was unidentifiable and released event as a static event IAW UI 10-30.
- 3. Event was released over and worldwide dissemination network at 23:48:04Z with our SIBRS released the event at 23:48:25Z with
- 4. Missile Warning Center called requesting if we had detected an event over Kuwait, we acknowledge that we did. Information was logged on DA 1594 and snap shot of event was recorded. (Snap shot enclosed).
- 5. POC for this action is CW4.

Col N Request for Data

ject:

am the HIGGINS Combat Systems Officer. LTJG forwarded me both of your requests for data.

Regarding the potential Tornado hit, I'm afraid we are unable to help. The number of data tapes we maintain on board is limited and if we are not mmediately aware of the need to pull them, they are re-used. At the time of this incident, we did not know that a tactically significant event had occured, so no tapes were saved.

Nith regard to the request about the 201030Z Patriot intercept, I request hat you route your request through NAVCENT. We are not eqipped to conduct lata reduction and all our tapes have been routed via NAVCENT to NAWC Corona or data reduction.

Ve save tapes for all TBM detects but if there are other events of interest o you, (down aircraft that we might have had radar contact with, or other ingagements) please have your watchstanders ask the TAO on watch in the chat oom to pull the tapes. We will gladly do so and route them to Corona for lata reduction.

/ery Respectfully, CDR Separate State Systems Officer HIGGINS (DDG 76)

Subject: HOT HOT -- Udairi2A WFZ

AJ, please forward to all parties with a vested interest...

To all...

The Jaber AB Team built a series of arrivals that deconflict aircraft enroute to and coming from Iraq. These arrivals have allowed 332 aircraft to deconflict both laterally and vertically from each other. If the Patriot folks want to activate WFZs, they NEED to create these outside of these arrival corridors. Our pilots took off yesterday to get an inflight notam on an activated WFZ to the northwest of AJ...this played MAJOR havoc with the missions they were departing on...

For example, going to the Skidder CP, RTB'g through Tahoe Overpass..., etc.

If we need to make changes to our procedures to eliminate the potential of Patriot fratricide, let's do it...my only recommendation is let's build these zones outside of our corridors... I stand by waiting to immediately discuss this issue. I'll be at the EOC until about 0800Z when I go into crew rest...

Gentlemen, please take a look at the below information and the PP slide to see where the new WFZ is plotted in respect to all the measures we have in place. Please provide feedback. We all must ensure that the pilots ARE NOT flying in this area at all.

KUWAIT AIRSPACE--Aircraft and Patriot Missile Deconfliction--COL FLEET SENDS FROM KUWAIT

portance:

biect:

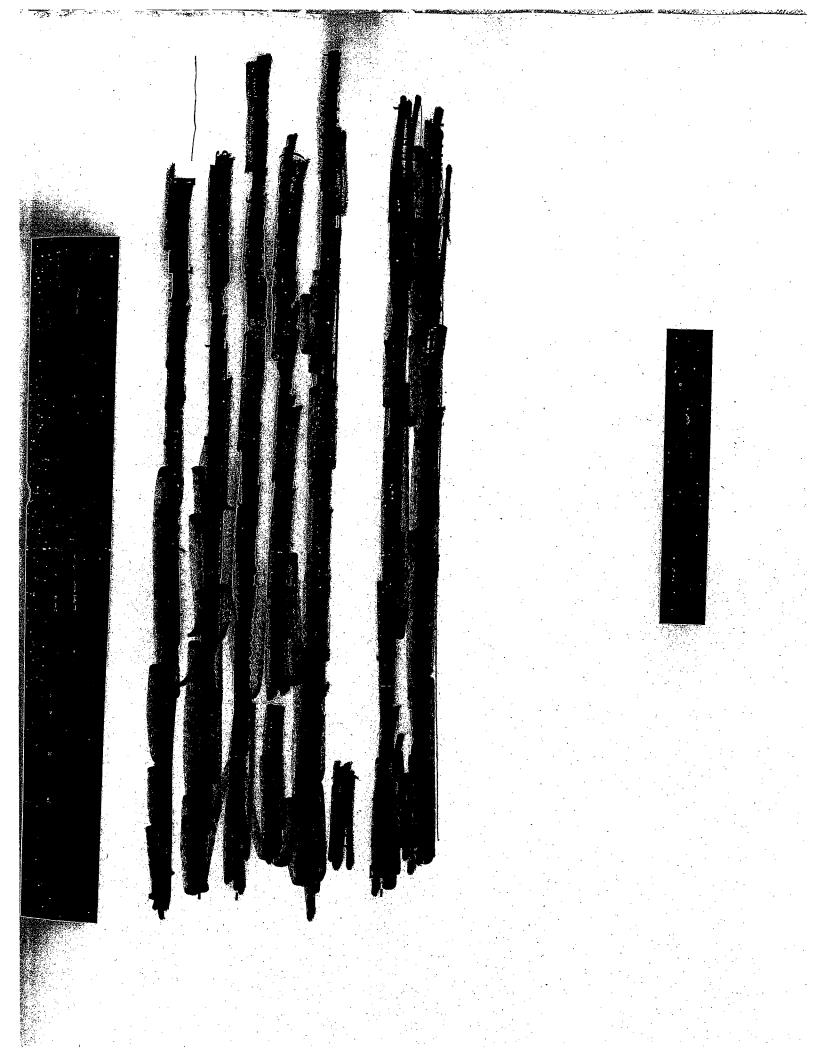

High

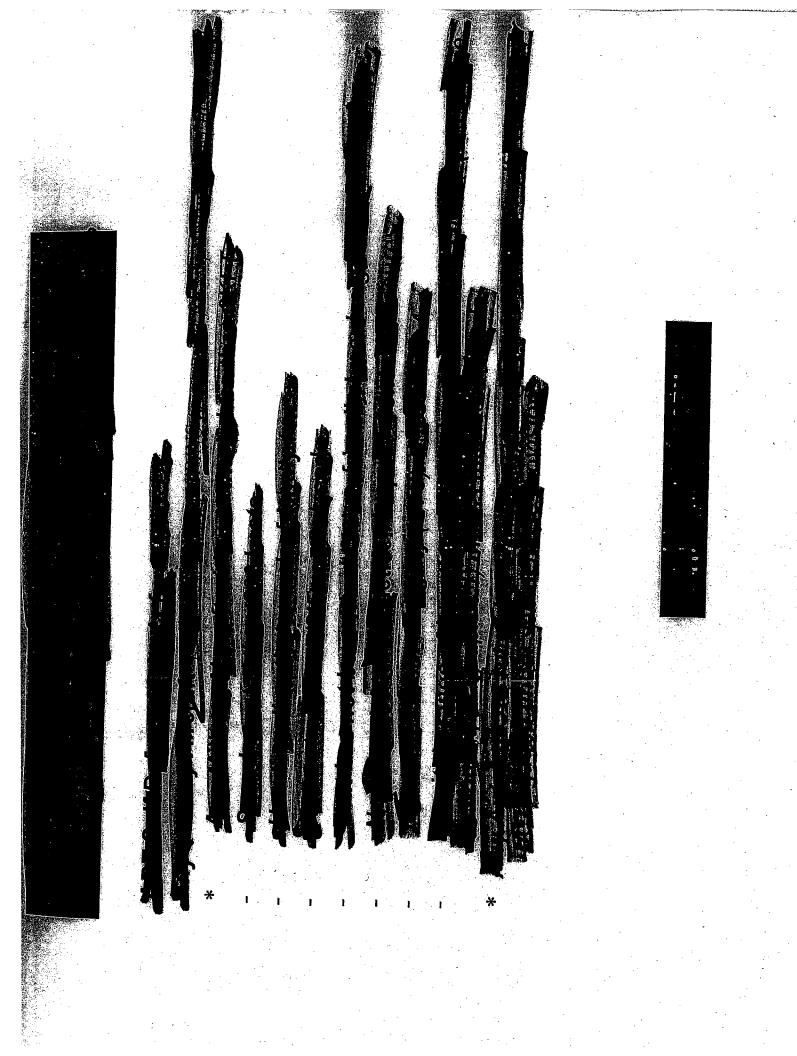

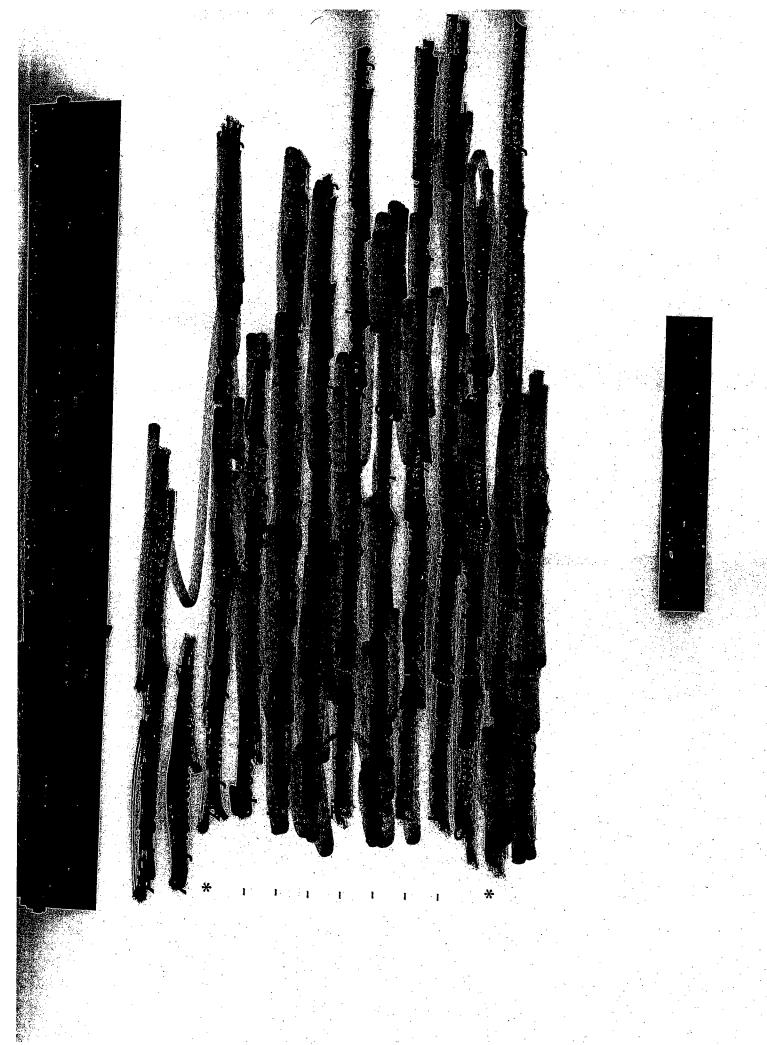

e taken place at altitudes from ances of e only ranged from Moreover, ected primarily by PATRIOT radars/ Our DAADC is particularly (with the most recent cerned about the risks to civilian air traffic in and around Kuwait y, however, the high concentration of military aircraft within this fined airspace are also at considerable risk. While we cannot afford Tet one TBM hit a defended asset, we must also do everything we can protect our friendly civil and military aircraft.

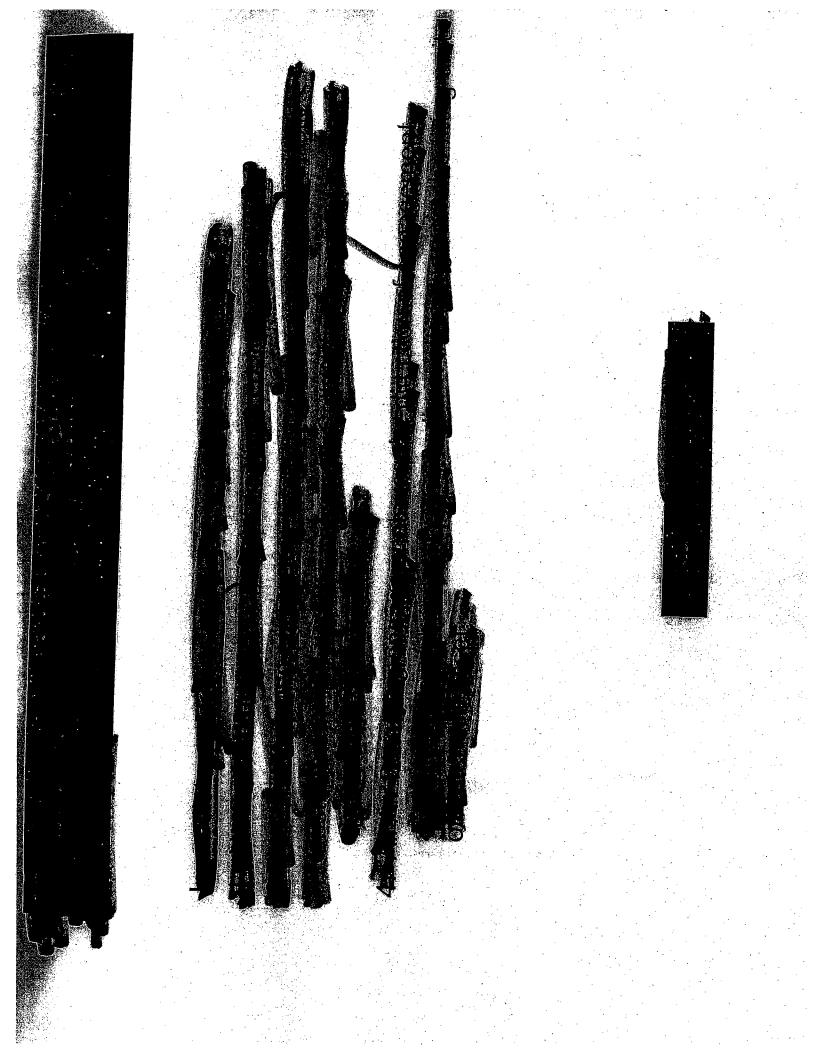

west you put a "tiger team" of experts together right away to figure ways to minimize risk to both. This might require a modification to sent airspace/airspace control measures over Kuwait, to include sible re-routing of civilian air traffic into KCIA. Options to sider: can civil/military approaches/departures at KCIA be only from South?; can Skidder and Slammer Tracks/CAS Stacks be moved North?; routing for Al Jaber and Al Salem be adjusted away from PATRIOT mary Target Lines (PTLs)?; can the Kuwaiti western DCA cap be moved?; he GR-4 join up point at risk?; have all rotary wing assets been fied of PATRIOT battery locations? THIS LIST IS OBVIOUSLY NOT USIVE! (Note: Weapons Free Zones/ROZs/No Fly Zones do not work and air bases/airports and, moreover, there is no time to vate/deactivate them).

nermore, as the focus of TBM defense shifts from Basrah to Baghdad short-range to possible longer range TBMs), we need to think t how to adjust airspace as PATRIOT engagements shift left (from ch points in Basrah to those possibly in Baghdad).

## I. Notes:

\_ E3 South

- A. CDC383 was the relieving E-3 for the south orbit.
- B. Track 01567 as reported by center E-3 is probably Yahoo 75. Tape reviews from both center and south orbits support this identification despite inconsistencies between the sensed Mode 2 (0134) and the Mode 2 assigned in the Air Task Order (3075); the sensed Mode 3 squawk for track 01567 (2471) IS the assigned Mode 3 from the ATO.
- C. CDC383 tape is used for the chronological reconstruction of events.

## II. Chronological Events:

Based on numerous reviews of center and south E-3 tapes this track is assessed to be Yahoo 75. Although the Mode 2 is inconsistent with the ATO, the flight path, timing, and correct Mode 3 (2471 sensed once the track is in Kuwait), strongly supports the assumption that this contact is Yahoo 75. A Mode 4 auto full-scan interrogation returns a SINGLE valid mode 4 response for Track 01567.

B. 233416 Z – indications of 2 radar contacts one IFF return

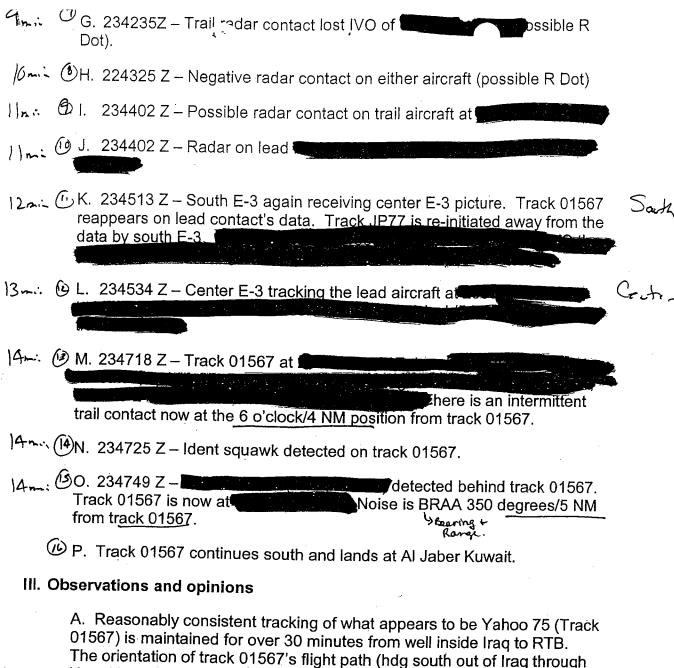

5 min (3) C. 233804 Z – Good tracking by center track 01567 now at E-3

The contact is approximately 45 degrees
onset to the left and paralleling 01567's flight path. A Mode 4 auto fullscan interrogation returns no Mode 4 indications on either Yahoo 75 or the
radar only contact. The south E-3 puts symbology on radar only contact
track 02461 (TKD JP77). The track is not told across the link because the
south E-3 is not yet transmitting in the link due to south orbit station

(Yelicity)

E. 234135 Z – Radar contact on Yahoo 75 at Superior at this time (South link handover in progress).

F. 234206 Z – South E-3 places symbology back on lead contact—Yahoo 75, track 02461 (TKD JP77); south E-3 (mission CDC383) now active in link—PU 00005. Track 02461 now being used to track both contacts.

- A. Reasonably consistent tracking of what appears to be Yahoo 75 (Track 01567) is maintained for over 30 minutes from well inside Iraq to RTB. The orientation of track 01567's flight path (hdg south out of Iraq through Kuwait) made radar contact intermittent due to There are consistent IFF returns on Track 01567 which enable the Center E-3 to maintain consistent symbology.
- B. Both and the center E-3 hold track 01567; the reporting unit for track 01567 bounces back and forth between the two agencies several times during the Yahoo 75's flight through Kuwait.
- C. The trail radar data detected by the south E-3 (CDC383) appears to be flying a loose formation with Yahoo 75 and is presumably Yahoo 76. The track parallels Yahoo 75's flight path maintaining a formation anywhere

from 3 to 6 NM in trail from the left 8 o'clock to right 5 o'clock position. However, radar council is intermittent and there is never any IFF to verify his identity. The radar noise at 234749Z may be radar returns off of the aircraft's debris and there is no further indication of a trail contact from that point forward.

\*

D. An E-2C was on orbit in Aries 2 when Yahoo 75 crossed into Kuwait flying directly under it. A Mode 3-6455 was detected just south of the radar "noise", and the ATO identifies that aircraft as Dustoff 60 an army helicopter.

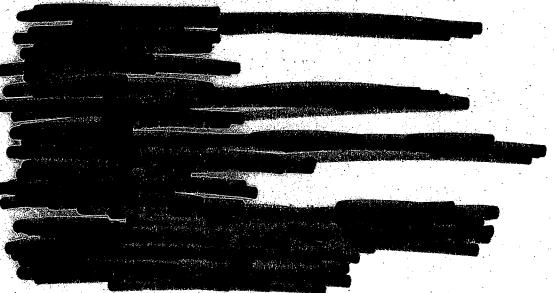

E. Several army units inside Kuwait, including ADA, were active in Link 16 with good Position and Time Quality: JUs 136, 377, 134 and 357 and JU 11

IFF DEGRADED

. Tactical Significance:

Minor degradation in IFF operation. A single low priority IFF antenna element has indicated a failure (element 1,2,15,16).

Probable Fault:

A single IFF antenna element (1, 2, 15, 16)

State of Readiness: Operational

Unit Status: Mission Capable

Recomendation: Fight, Fix Later

# PATRIOT BLUE ON BLUE ENGAGEMENT (232347ZMAR03) UPDATE (U)

# WHAT HAPPENED (U)

·Fire Unit: C/5-52 in Kuwait near Ali Al Salem Air Base

Battalion: No connectivity to any Battalion or other Fire Units

Aircraft (RAF TORNADO) reportedly,

No IFF response received by Fire Unit

One PAC-2 missile fired

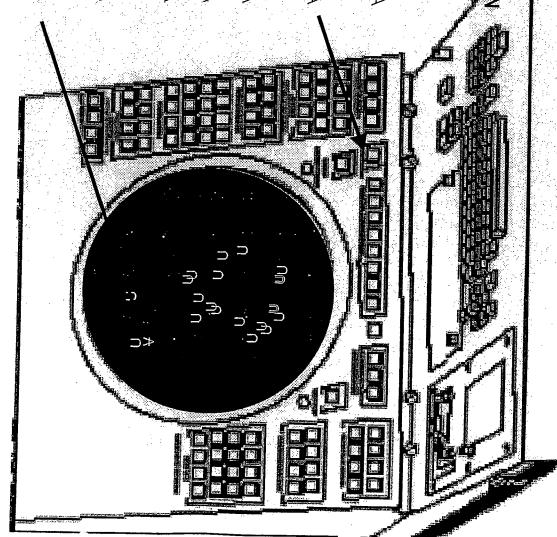

## NORMAL ARM SYMBOLOGY AND ENGAGEMENT SEQUENCE (U)

- ∀ ARM symbol (∀) appears on Situation
  Display
- ∀ "ARM Threat Warning" alert provided to operator
- ♥ Operator hooks ARM symbol
- ∀ One or both Operators evaluate track
- ♥ Operator brings one or more launchers to "Operate" status
- ∀ Operator presses "Engage" switch on front panel
- ✓ System will automatically perform Final IFF action, and engagement will be stopped if valid replies are received; otherwise target is engaged

Note: [U] = ABT ID'd as Unknown

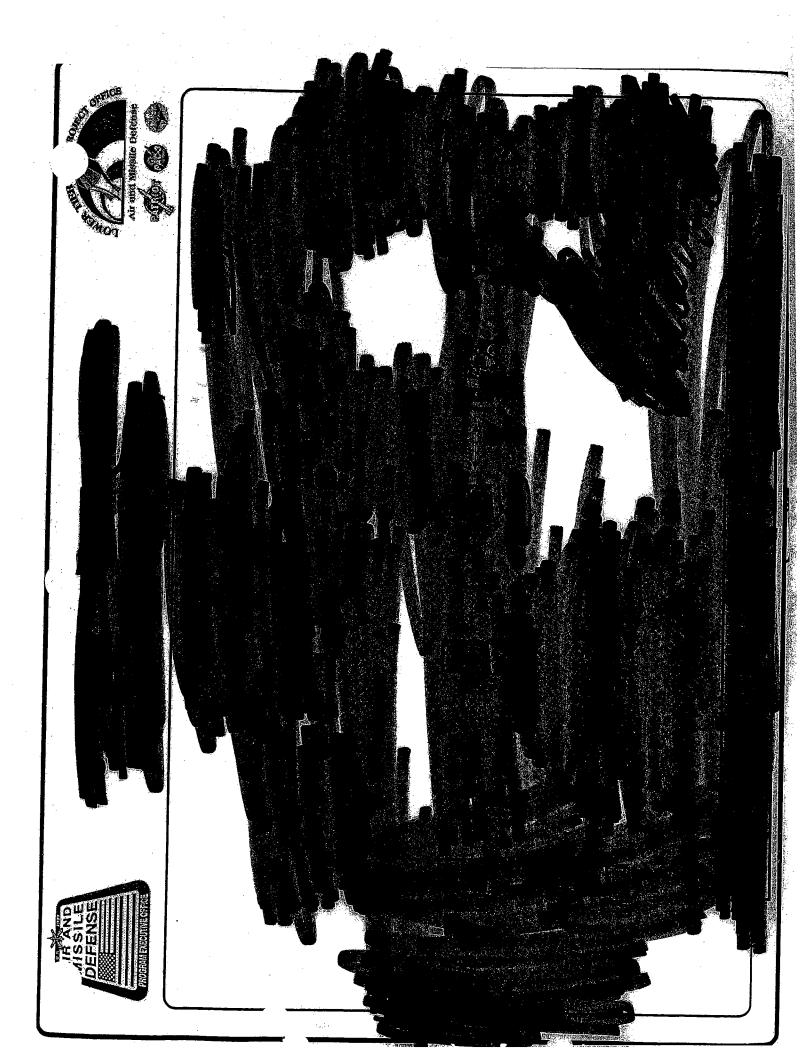

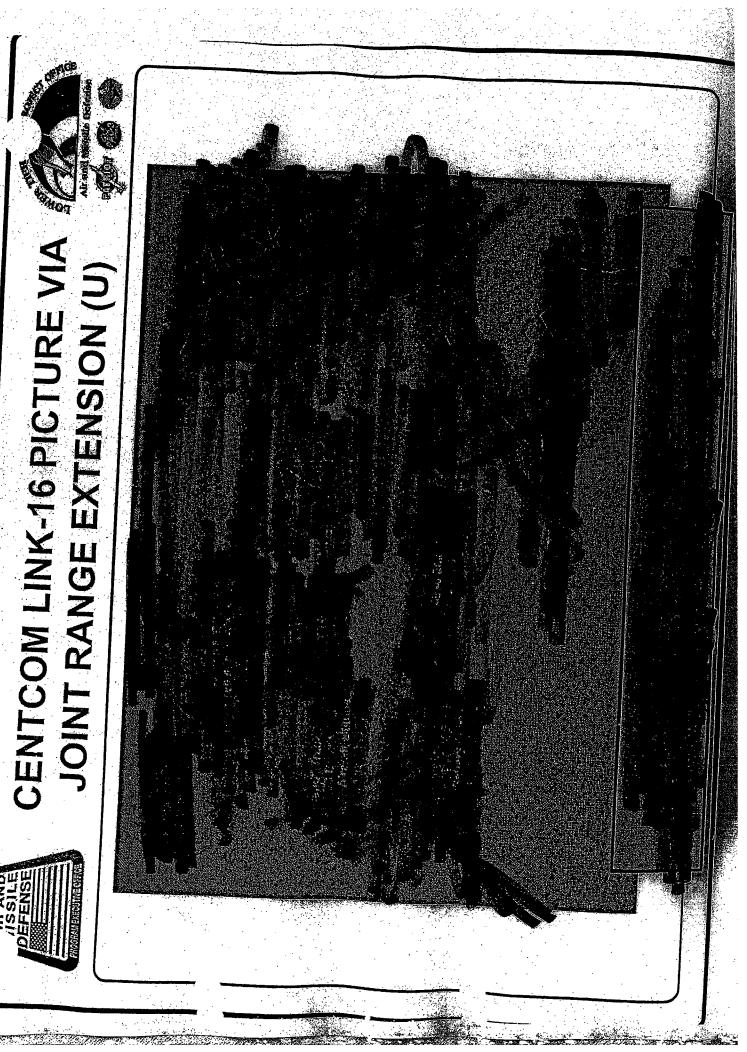

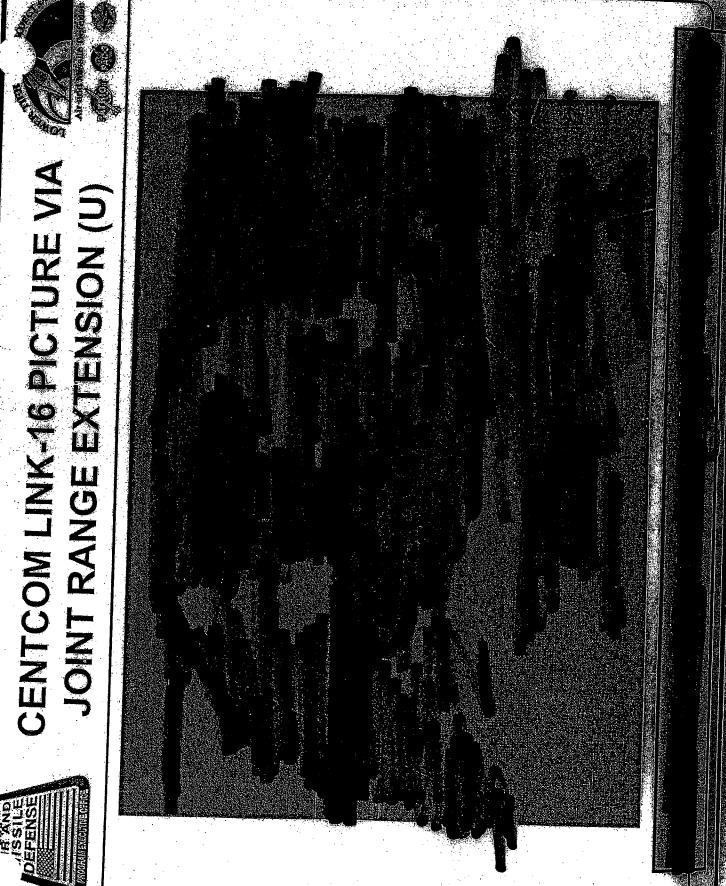

# ARM CLASSIFICATION (U)

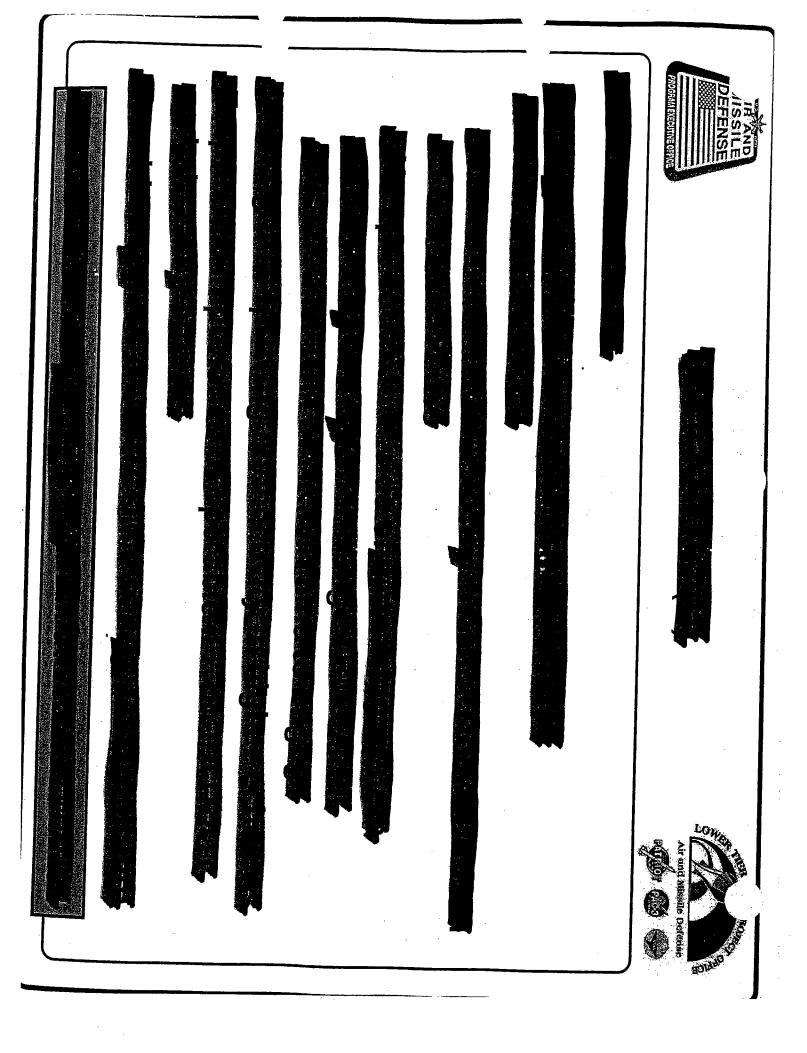

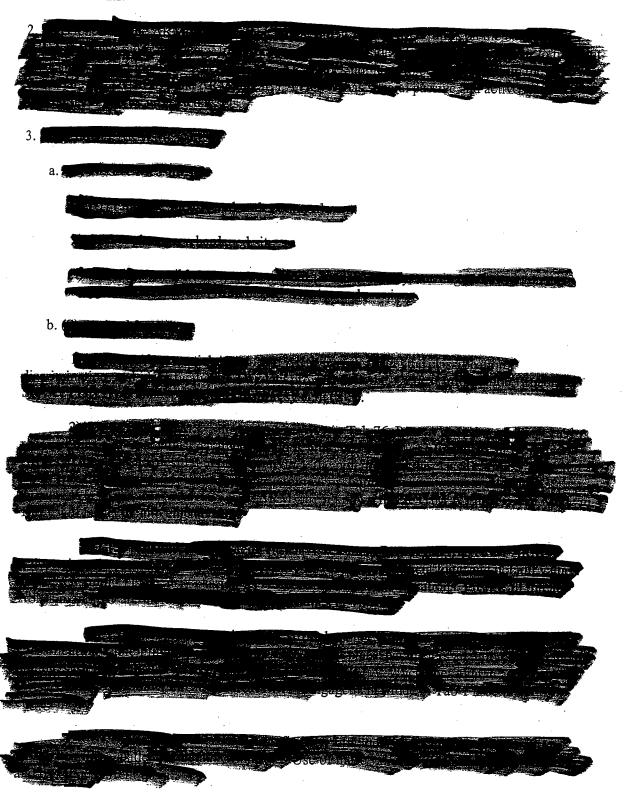

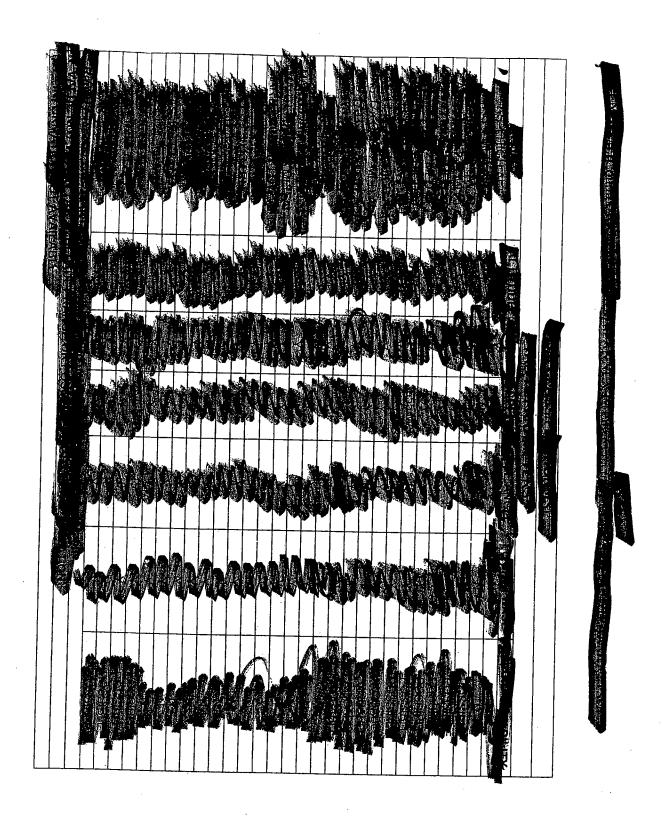

APPENDIX 4 (Counter Ak... Procedures) to ANNEX F (Engagement Procedures) to the 32D AAMDC TSOP

1. (U) Purpose. To establish the counter Anti-Radiation Missile (ARM) procedures for PATRIOT units.

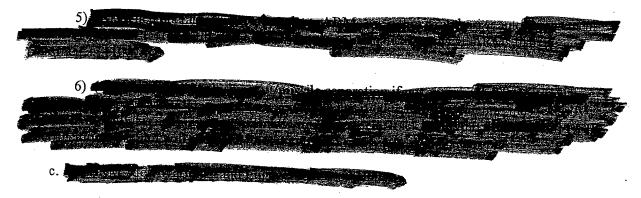

4) (U) Enable CARM Mode S/I. This invokes all of the ARM countermeasures initialized in Tab 76, Page B. This S/I allows the operator to implement low power, authorize frequency diversity, reduced search, and enable ARM automatic engagement modes. Operators should always verify Tab 76, Pages A and B before enabling the CARM Mode S/I.

1) (U) The PATRIOT system provides the operator with three levels of ARM alert warnings:

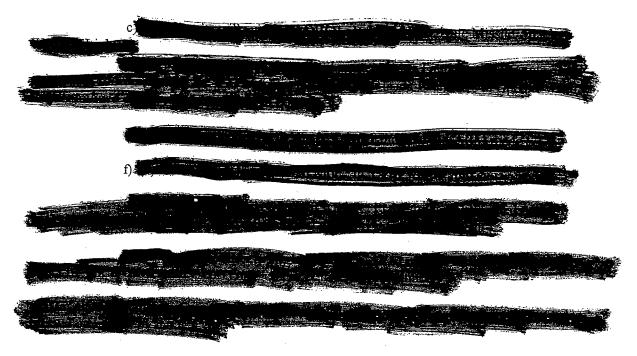

a) (U) General ARM threat warning - ICC operator can provide the fire unit with a general alert message that indicates that ARM carrying aircraft are in the vicinity (data TIBS and SIS). Fire units will increase search for possible ARM carriers.

b) (U) ARM carrier alert - system indicates an ARM carrier has been identified. Manual engagement may be required if not assessed as a threatening ABT. Initiate ARM engagement procedures.

c) (U) ARM attack alert - system indicates an ARM has been identified as attacking a fire unit. Initiate ARM engagement procedures.

APPENDIX 4 (Counter A) Procedures) to ANNEX F (Engagement 1 occdures) to the 32D AAMDC TSOP

## TAB DA

## PATRIOT SPURIOUS TRACKS (U)

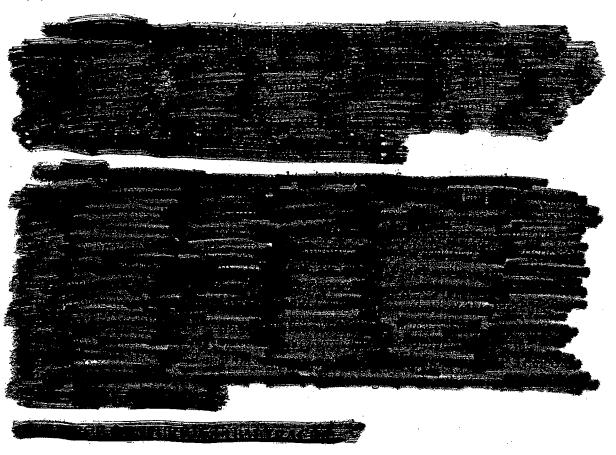

## (U) INTRODUCTION

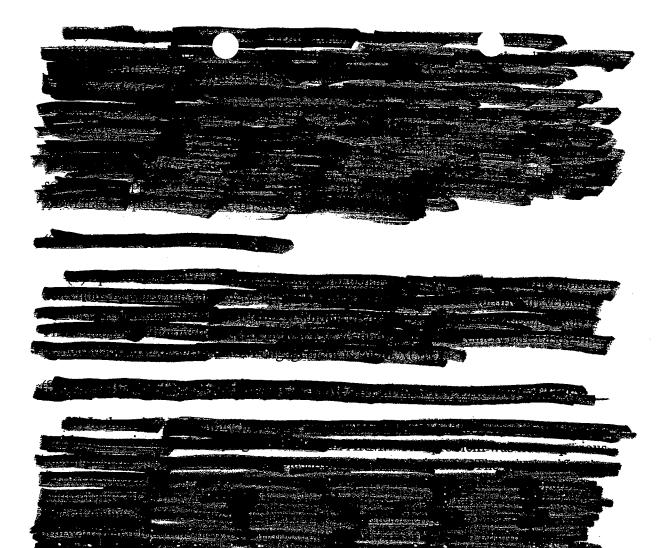

## (U) BACKGROUND

(U) Real-world environments contain a number of phenomena that may be detected by the PATRIOT radar. These phenomena include clutter and weather conditions, such as sandstorms and rainstorms. The PATRIOT system logic automatically determines which radar detections are valid targets, places these targets under track, classifies them, and displays them to the operator. Occasionally, radar detections on natural phenomena may be consistent with real threat targets, and the logic may initiate a track. For a short time, these tracks may be displayed to the operator, but the system usually recognizes them as clutter or spurious tracks, and they are dropped.
